## FOR IMMEDIATE RELEASE

### **Sovereign Pipe Technologies Welcomes Citizen Potawatomi Legislature During 2024 CPN Family Reunion Festival**

**Shawnee, OK** - Sovereign Pipe Technologies, a leading high-density polyethylene pipe manufacturer in Shawnee, was honored to host members of the Citizen Potawatomi Nation (CPN) Legislature at its facility during the 2024 CPN Family Reunion Festival. This festival, an annual event cherished by all descendants of the Citizen Potawatomi Tribe, encourages unity and collaboration by bringing together Tribal Legislatures and leaders from across the nation.

During this visit, legislative members including Eva Marie Carney (District 2), Bob Whistler (District 3), Mark Johnson (District 7), Dave Carney (District 8), and Paul Wesselhoft (District 9) were given an exclusive tour of the pipe manufacturing facility. The tour, led by Sovereign Pipe Technologies' CEO and Director, Ronnie Wear, Vice President of Sales, Jeremy Hohn, and Vice President of Quality, Barb Donaldson, marked the first time the plant has been showcased producing pipe at full capacity to Tribal leadership.

"Hosting the Citizen Potawatomi Nation Legislature at our facility was an incredible honor," said Wear. "It was a unique opportunity to demonstrate our cutting-edge technology and steel pipe production capabilities, and to discuss opportunities to support CPN's growth and programs."

The experts behind Sovereign Pipe Technologies, with their extensive 50 years of experience within the HDPE arena of executive leadership, have propelled the company to its position as a leading manufacturer of high-density polyethylene pipe. They offer a wide range of HDPE pipe, from ¾" to 48" diameters, to cater to various project requirements. The company's product line includes energy service line pipe, water pipe, and sewer pipe.

Sovereign Pipe Technologies is committed to offering environmentally friendly plastic pipe that can withstand various pressures, temperatures, and harsh environments above and below ground. They are leak-free, durable, low-maintenance, and manufactured to be reliable for many years to come, ensuring a long-lasting investment for their customers.
